

The Schüco Guarantee
for components in aluminium system
and project solutions

10
YEAR
GUARANTEE

SCHÜCO

GUARANTEED: PROVEN RELIABILITY

Schüco windows, doors and façades are used in buildings around the world. What makes them stand out? Form and function, quality and reliability. Schüco places very high requirements on its aluminium system and project solutions. We stand for future viability and sustainability. The properties and performance values of our products are assessed and verified by independent test institutes. We therefore provide our customers with an extended guarantee for the components in our aluminium system and project solutions.

OUR GUARANTEE

- New delivery or
- Rectification or
- Contribution to fabrication or installation costs

(Up to 3 times the net invoice value of the affected components, max. €500,000)

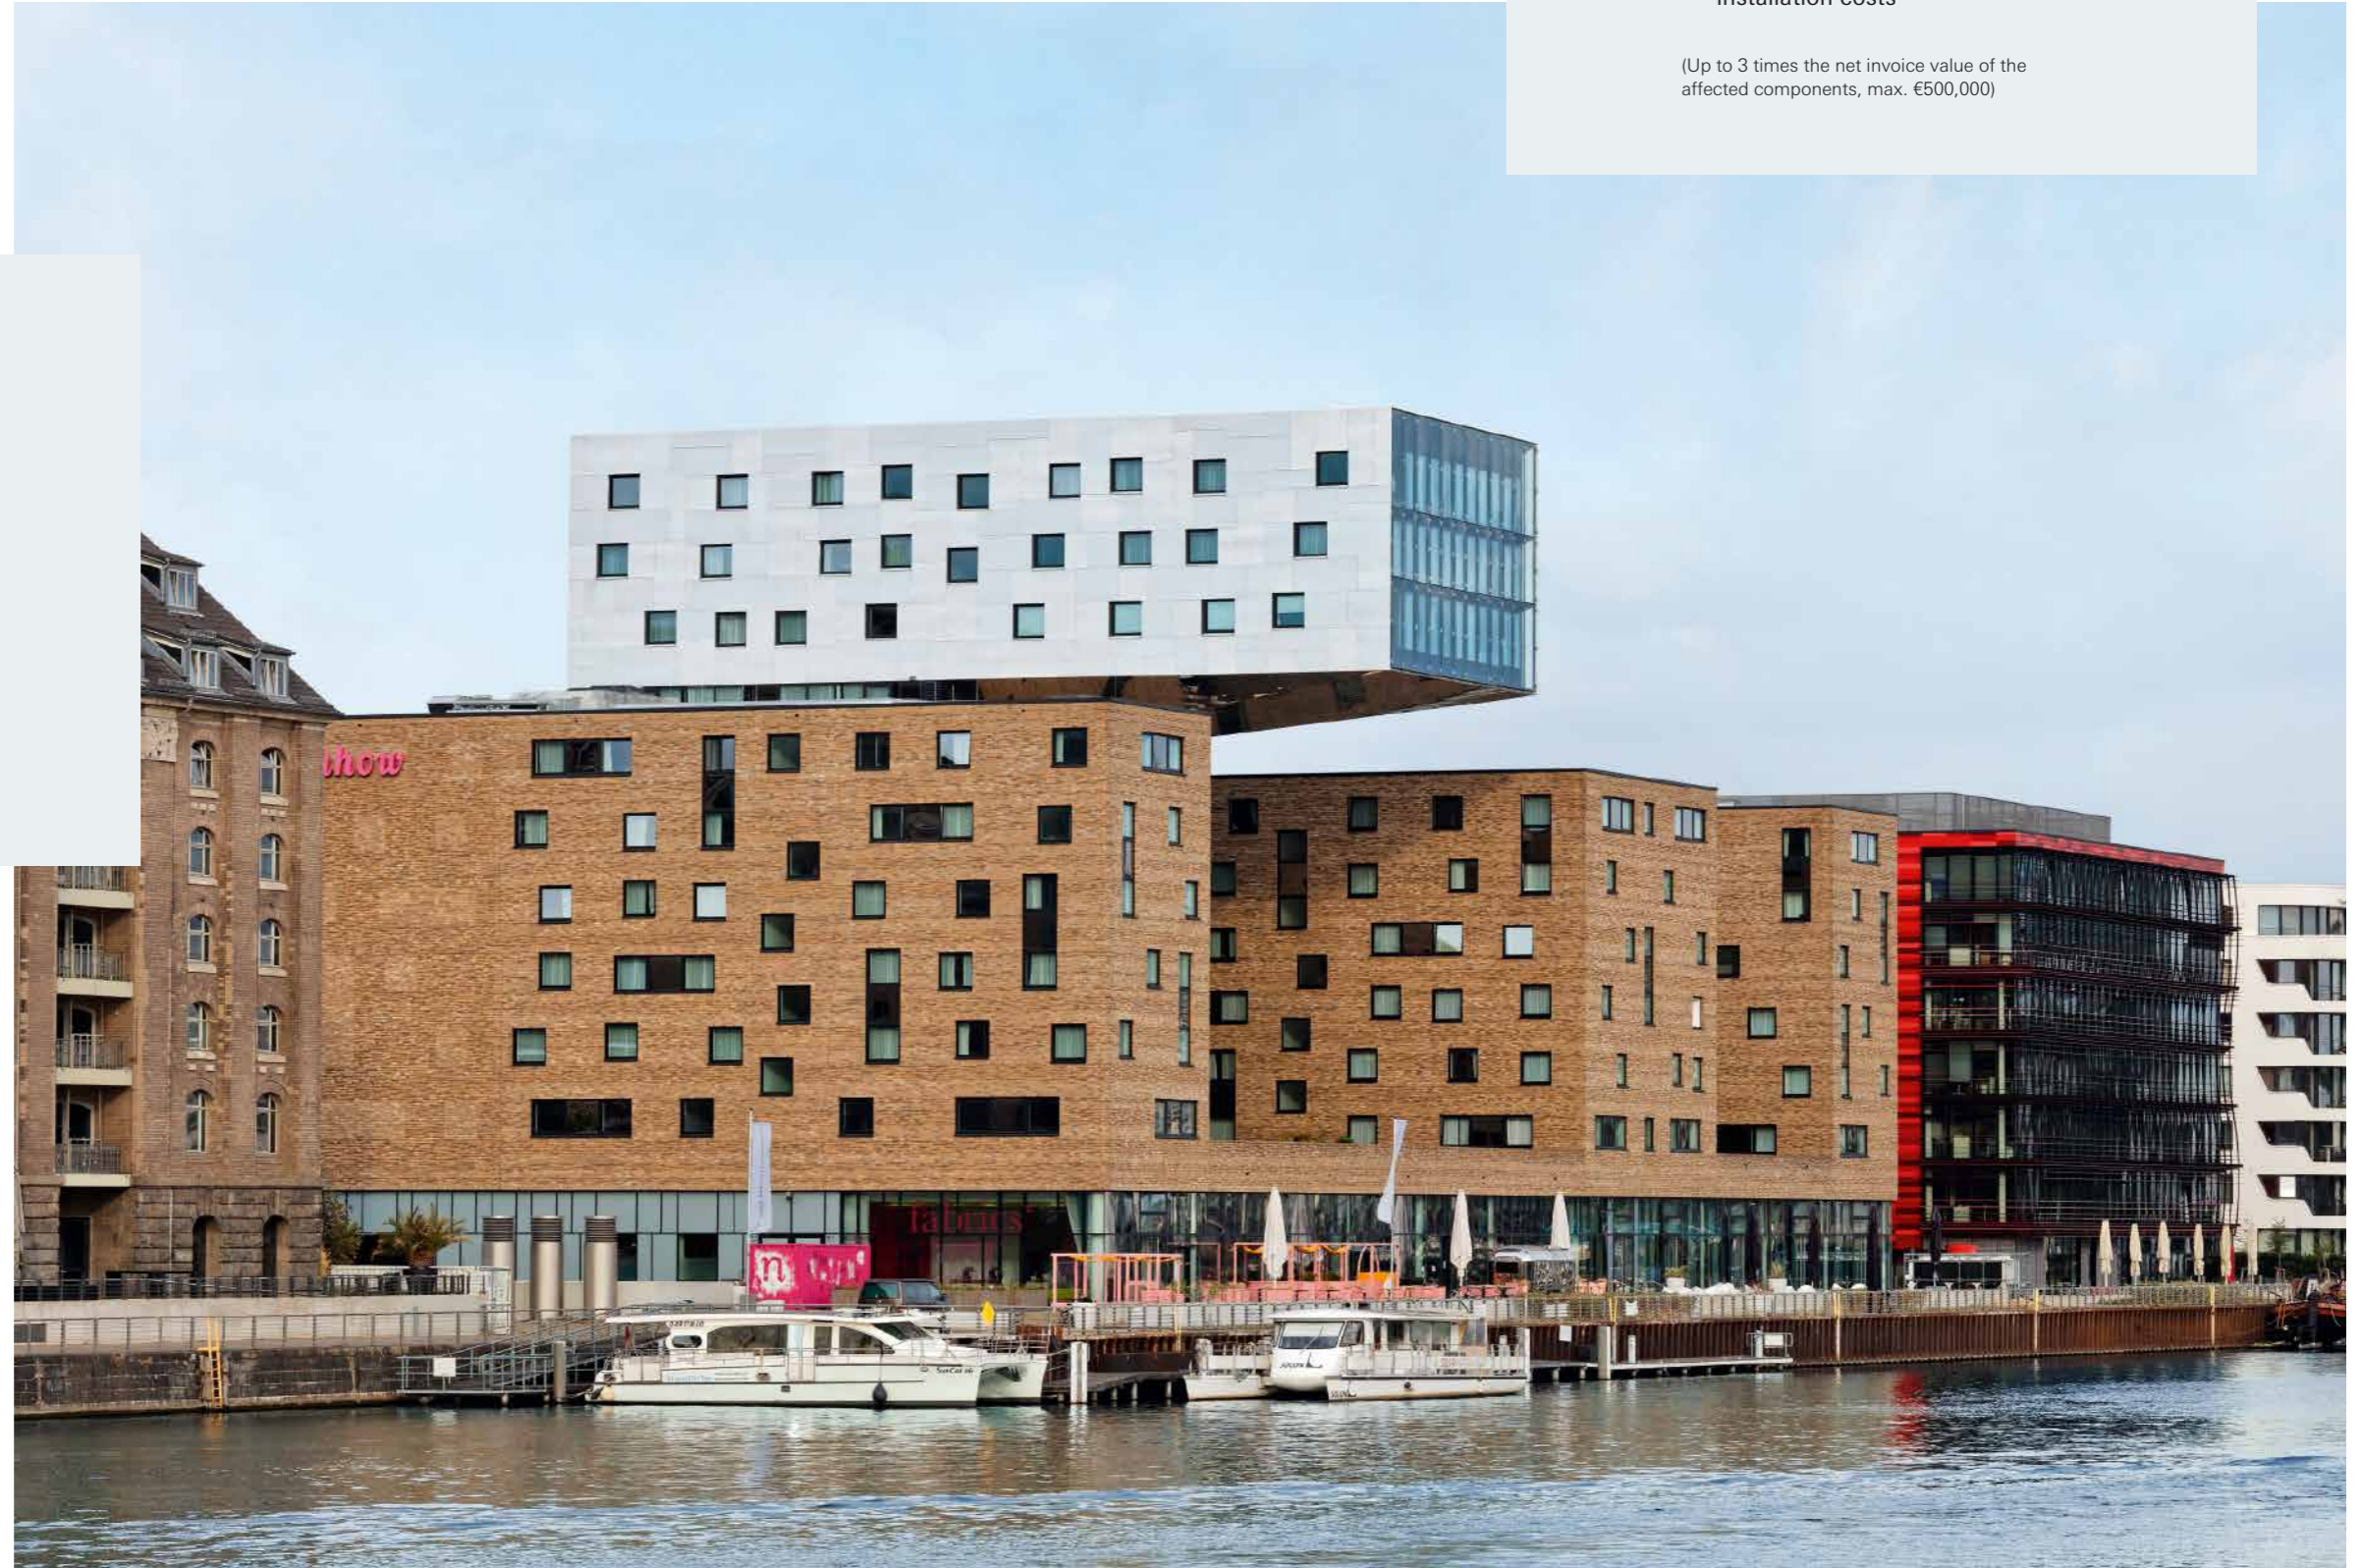

OUR GUARANTEE COVERS

Aluminium profiles and sheets:
mechanical properties, tolerances and alloy composition

Fittings and gaskets:
long-term durability and other article properties

Composite profile connection:
mechanical connection between insulating bar and profile

Surface treatment:
e.g. coating adhesion, retention of colour and gloss

The terms and conditions of the guarantee certificate issued to you apply.

Schüco solutions stand for sustainable quality.

In terms of security, energy efficiency, aesthetics and comfort, the building envelope plays a key role today, both in newbuilds and when modernising existing buildings. It must be extremely reliable over a long period of time, in all climate zones of the world.

IMPRESSIVE TECHNOLOGY AND DESIGN

We offer comprehensive consultancy on the use of all Schüco products and guarantee functional reliability during construction and operation.

SERVICES WITH A FUTURE

For us, economical construction does not end with the commissioning of the building. The lifecycle of the building products also contributes to the sustainability of a building, making it an important factor in its long-term, economical operation.

Building envelopes from Schüco are reliable, sustainable and deliver high performance.

CREATING VALUE THROUGH QUALITY

- Effective and comprehensive consultancy
- Planning reliability and durable systems from a single source
- High-yield solutions for the building envelope
- Outstanding quality

The Schüco Technology Center: Accredited, experienced, independent

HIGH-PERFORMANCE TEST CENTRE

The wide range of functions and standards which must be fulfilled by modern building envelopes in all climate zones means that the requirements for high-quality tests increase too. The Schüco Technology Center in Bielefeld is one of the world's leading test centres for windows, façades, doors and accessories.

For almost five decades, we have worked intensively with the performance of materials and constructions against a variety of external factors and loads. We use this expertise to accompany our own product development and support our partners as a manufacturing laboratory with project-specific testing. The Schüco Technology Center is accredited as an independent (manufacturing) test laboratory and DAkkS calibration laboratory by the national accreditation body for the Federal Republic of Germany. This means that we offer secure, reliable and independent results based on globally recognised competence standards in the areas of test facilities, staff and organisations.

TESTING AND OPTIMISING

Building component, material and environmental simulation tests are some of the main specialist areas at the Schüco Technology Center.

RESEARCH AND DEVELOPMENT

We continually optimise new systems and validate findings on an ongoing basis. Using our own test samples, we test the long-term durability of doors and the ageing behaviour of materials under the influence of heat, cold, moisture and UV light.

GET YOUR GUARANTEE

Extra protection with maximum reliability.
Reliable and fast, Schüco is always at your side.
